

188. Best Time to Buy and Sell Stock IV

Solved 

Hard

 Topics

 Companies

You are given an integer array `prices` where `prices[i]` is the price of a given stock on the *i*th day, and an integer *k*.

Find the maximum profit you can achieve. You may complete at most *k* transactions: i.e. you may buy at most *k* times and sell at most *k* times.

Note: You may not engage in multiple transactions simultaneously (i.e., you must sell the stock before you buy again).
